

EcoPlumbers® is a plumbing sustainability programme designed uniquely for New Zealand conditions.

EcoPlumbers is available to Master Plumbers full member companies – helping you meet the growing demand by Kiwi consumers for energy- and water-efficient solutions.

This programme is great for the environment, great for your business!

The company principal, and at least one licensed employee, must successfully complete the full EcoPlumbers programme to register the company as an EcoPlumber.

All EcoPlumber companies pay an annual licence fee and complete a refresher course every two years to maintain their status.

This entitles you to use the EcoPlumbers brand in your business – assuring customers that you are operating in a knowledgeable, professional manner while also meeting your obligations under the Fair Trading Act.
